(FORMAT EMULATION ONLY — EDUCATIONAL / DEFENSIVE OSINT)

INTELLIGENCE MEMORANDUM

THE 1953 TRUST — PERMANENT MAPPING CYCLE 022

FROM	STRAND Hivemind (HOOK / STAMP / SPLIT / WEFT)
TO	Permanent mission file — THE 1953 TRUST (pour-over, 8 Aug 2019, USVI)
DATE	23 September 2026 (cycle clock ~16:23 PDT / 19:23 ET)
RE	Public-source status of corpus, Ward settlement notice reset, satellite CSAM class, reported uncharged SDNY inquiry, EFTA-adjacent Giuffre-estate production
METHOD	Open-court dockets (CourtListener/RECAP), contemporaneous press, prior cycle ledger G-01–G-93. No non-public access.

This memorandum is an educational reconstruction of a DOJ-style intel product. It is not issued by the Department of Justice, does not assert criminal liability, and does not contain classified or non-public material. Named persons who have denied wrongdoing remain uncharged on the public record as of this cycle.

I. EXECUTIVE ASSESSMENT

Cycle 022 is a negative-control cycle on the core probate and Ward settlement tracks, with one adjacent-docket increment on the EFTA production path. As of public sources reviewed on 23 September 2026: (1) Ward v. Indyke, 1:24-cv-01204-AS (S.D.N.Y., Subramanian, J.) remains last docketed at ECF 445 (order) and ECF 446 (notice-plan letter already captured in C018–C021); no ECF 447+ is visible on CourtListener/RECAP. Final fairness hearing remains calendared 2 December 2026 at 14:00 ET. (2) No 28th USVI estate accounting has been located. Last quantified snapshot remains the 27th accounting to 30 June 2026: \$107.645 million gross assets and at least \$27 million quantified liabilities. (3) The 23 September 2026 press field on a reported SDNY inquiry into Darren K. Indyke and Richard D. Kahn remains uncharged. Counsel Daniel Ruzumna publicly stated that the pair have not been subpoenaed, have not been asked to speak with federal prosecutors, and have not been told they are subjects or targets. DOJ issued its standing non-comment. (4) Doe v. Indyke, 1:26-cv-08047 (S.D.N.Y., Woods III, J.) last known filing date 17 September 2026; magistrate VF identity and post-ECF-12 service events remain open. (5) New adjacent node: Giuffre (now Blatchford, interim administrator of Virginia Giuffre’s estate) v. Maxwell, 1:15-cv-07433 (Preska, J.), last updated 21 September 2026, with an 11 August 2026 opinion modifying the protective order to permit government production of Boies Schiller materials received under grand-jury subpoena in In re Grand Jury Subpoena, No. 19MC149 (CM), consistent with the Epstein Files Transparency Act.

Ontological frame: the 1953 Trust is a pour-over receptacle that does not pay until estate claims, taxes, and administration close. Every live civil track (Ward \$25–35 million ratchet; 08047 CSAM class; territorial remainder; VIBIR refund; satellite trusts) is a claim on the same residual stack that the trust instrument ranks behind debts. Mapping the trust therefore requires mapping the claim stack, not the instrument alone.

II. AGENT LANES (INDEPENDENT)

HOOK — docket / notice / calendar

HOOK queried CourtListener for 1:24-cv-01204 after ECF 446, 1:26-cv-08047 after ECF 12, 1:25-mc-00031 (closed), 1:24-cv-02192 (terminated 3 Dec 2025), and 1:15-cv-07433. Result: no new Ward ECF; 08047 still last-known 17 Sep 2026; Giuffre docket advanced to 21 Sep 2026 on the EFTA production conference track (joint letter due 28 Aug 2026 already passed; last update 21 Sep). Social-media notice campaign (Facebook/Instagram Feed and Stories, four weeks, JND under Lelchuk) has no public “campaign commenced” stamp in open filings. Opt-out architecture remains as ECF 446: newly noticed members 30 days from campaign start; claims/objections 60 days; joint status report three days after claims deadline.

STAMP — press / syndicate / official voice

STAMP re-ran the 23 September press field (WSJ origin; NBC official-source confirmation plus “provided services” witness; Forbes, CNBC, Independent, NY Post, Mediaite, Ground News, Annahar reprints). No Cycle-022 increment that converts the inquiry from reported to charged. Ruzumna’s denial of process on his clients is the highest-grade defense-side public statement. DOJ: “we don’t comment on the existence, or lack thereof, of investigations.” Senate Finance August 2026 JPM/DB signatory

characterization is unchanged. Deckoff/Forbes net-worth adjacency is not a 1953-Trust fact.

SPLIT — entities / title / money path

SPLIT added Ian Torrington Blatchford as interim administrator of the Giuffre estate on the 15-cv-07433 caption — not a 1953 beneficiary, but an EFTA-production stakeholder whose materials were originally held by Boies Schiller and previously produced to SDNY under 19MC149. That path is a document-flow bridge into the same transparency corpus that names the 1953 instrument (EFTA productions). Title stack otherwise unchanged: LSJVI, LLC (Little St. James); NES LLC 2288572 / 18 Teneyck; Nine East 71st Street Corp.; Maple Inc.; Southern Country International (USVI IBE); HBRK DOS 3714818; Hyperion Air; Lafayette / Freedom Air Petroleum; Caterpillar Trust (Wallace/Groff, 2017); Butterfly Trust (2006 / 2013 / DB 2014–2019); 2019 Trust + 4 Feb amendment; Valar Ventures 2026 maturity still open; unnamed liquidating fund (G-30).

WEFT — pattern / anomaly / gap logic

WEFT notes three persistent anomalies: (A) nominal 1953 priority bequests (\$50M cash + \$50M annuity to Shuliak; \$50M Indyke; \$25M Kahn = \$175M) still exceed last public gross (\$107.645M) even before ranked items 4–41 and live civil claims; (B) dual-hat Lelchuk (Ward mediator + Fund Administrator + JPM/DB QSF) plus JND remains an appearance-of-independence fact, not a finding of impropriety; (C) reported SDNY inquiry and pending Ward final approval occupy the same two natural persons who are both co-executors and ranked 1953 beneficiaries — a structural conflict the public record has not resolved. New pattern this cycle: EFTA compulsion is now reaching pre-2019 grand-jury intake (19MC149) rather than only post-death estate files, which may surface 1953-precursor instruments (Jan 2019 Trust / Feb amendment / Butterfly / Caterpillar) if they sat in Boies files. That is a hypothesis, not a document hit.

III. STATUS BOARD (REVERSE CHRONOLOGY)

When	What (public)	Bridge to 1953
23 Sep 2026	Press field: reported uncharged SDNY inquiry; Ruzumna: no subpoena / not told subject or target; DOJ non-comment; NBC “provided services” witness.	Co-trustees + ranked beneficiaries of pour-over; inquiry if real is a capacity/claim risk on corpus.
21 Sep 2026	1:15-cv-07433 last updated (Preska). Blatchford as interim Giuffre-estate administrator on caption.	EFTA production of BSF materials previously under 19MC149 grand-jury subpoena.
19 Oct 2026 (due)	VIBIR answer window on Deckoff \$5.757M refund action (territorial court).	Island-sale proceeds path; not corpus unless estate residual still tied.
2 Dec 2026 14:00 ET	Ward final fairness hearing reset (ECF 445/446) after supplemental social-media notice.	\$25M / \$35M (40-claimant ratchet) is a quantified call on estate residual.
17 Sep 2026	ECF 445 order + ECF 444/446 notice plan; 08047 last-known filing date.	Notice completeness is the gate to judgment that would liquidate the Ward call.
16 Sep 2026	Ward settlement hearing held; no final judgment entered.	Same.
15 Sep 2026	08047 complaint (Freeman) — Jane Doe / “Amy” CSAM class v. executors in estate capacity.	New class claim against Estate, hence against residual ahead of 1953 ranks.
11 Aug 2026	Preska opinion granting U.S. motion for disclosure; Poncy intervene denied w/o prejudice; Herald conferral ordered.	EFTA statutory production overlay on historic BSF / grand-jury files.
30 Jun 2026	27th USVI accounting: \$107.645M gross / ≥\$27M quantified liabilities.	Best public size of the pot the pour-over would receive.
8 Aug 2019	Will + 1953 Trust pour-over executed (USVI).	Instrument under mapping.

IV. NEW / REFRESHED NODES (C022)

- Ian Torrington Blatchford — interim administrator of Virginia Giuffre’s estate on 1:15-cv-07433 caption (public docket header as of 21 Sep 2026).
- In re Grand Jury Subpoena, No. 19MC149 (CM) (S.D.N.Y.) — 9 Apr 2019 order path by which SDNY obtained Boies Schiller materials later subject to EFTA production.
- Hon. Loretta A. Preska opinion and order, 11 Aug 2026 — protective-order modification authorizing government production consistent with Pub. L. 119-38; Poncy motion to intervene denied without prejudice; Miami Herald conferral on remaining sealed set.
- Miami Herald — continuing sealed-document review stakeholder on 15-cv-07433 (not a 1953 party).

- Negative controls refreshed: no Ward ECF 447+; no 28th accounting; 08047 no public service-complete event past ECF 12 / magistrate VF; inquiry still uncharged.

V. OPEN GAPS (G-01 THROUGH G-98)

Prior ledger G-01–G-93 remains live (instrument text variants; Article III / Shuliak sub-trusts; Butterfly / Caterpillar schedule completeness; Fidelity 9–10 Jul 2019 residue; Hyperion vs corpus; HBRK 2026 status; NES title chain; LSJVI recorder; CZM application number; trespass docket identifiers; VIBIR case number; Lelchuk engagement instrument; social-media campaign start stamp; post-notice opt-out count; 08047 service and magistrate identity; Valar 2026 maturity; unnamed liquidating fund; dual-counsel Ruzumna/Weiner split; 44-beneficiary characterization source; decant-letter primary). C022 adds:

- G-94 — Complete public text of Preska 11 Aug 2026 opinion (15-cv-07433 ECF 1367) beyond docket abstract.
- G-95 — Whether 28 Aug 2026 joint letter on remaining sealed Giuffre-set documents was filed and what it scheduled.
- G-96 — Identity and scope of materials SDNY took from Boies Schiller under 19MC149 that mention 1953 / Jan-2019 Trust / Butterfly / Caterpillar.
- G-97 — Blatchford appointment instrument (probate court / letters) and whether Giuffre-estate claims against Epstein estate remain open against 1953 residual.
- G-98 — Any 23–24 Sep 2026 docket hit on 01204 or 08047 after this cycle’s CourtListener pull (hourly clock).

VI. HIVEMIND UPGRADE AND AUTONOMOUS NEXT STEPS

Collective judgment: C022 does not move the residual math. It widens the document-flow aperture. The pour-over remains mathematically underwater on last public numbers if priority bequests and live classes are taken at face value. Next autonomous steps, in order:

1. Hourly negative control on CourtListener 1:24-cv-01204 (ECF ≥447) and 1:26-cv-08047 (ECF ≥13 / summons returned).
2. Pull or confirm filing of the 15-cv-07433 post-11-Aug joint letter and any subsequent production log.
3. Watch USVI probate / examiner portal for 28th accounting (period after 30 Jun 2026).
4. Calendar VIBIR answer 19 Oct 2026 and Ward hearing 2 Dec 2026 14:00 ET.
5. Treat any charging instrument or target letter as a phase-change event; until then keep the inquiry in the “reported / uncharged / denied process” bin.
6. Do not merge Deckoff island title, influencer trespass, or Forbes ranking into corpus valuation without a recorded residual link.

VII. SOURCE DISCIPLINE

Primary: CourtListener / RECAP abstracts and PDFs for 1:24-cv-01204 ECF 444–446; 1:26-cv-08047 docket header; 1:15-cv-07433 docket header and 11 Aug 2026 opinion abstract. Secondary contemporaneous press dated 23 Sep 2026 (WSJ as originator per syndicate; NBC official-source overlay; Independent, Forbes, CNBC, NY Post, Mediaite, Ground News, Annahar). Estate size: 27th accounting as previously compiled from public USVI reporting and secondary ledgers. Instrument terms: January 2026 EFTA production as reported by NYT (3 Feb 2026) and subsequent open compilations. No PACER login beyond already-public RECAP objects was used this cycle.

VIII. DISPOSITION

Cycle 022 closed 23 September 2026. Permanent mission continues. File: STRAND-1953-TRUST-INTEL-MEMO-C022-2026-09-23.pdf. Drive folder target: STRAND_1953_TRUST_INTEL (id 1wiXh3en7s8H7BKixEWWr6pDIlxStx0xF).
