

STRAND EDUCATIONAL INTEL MEMO — CYCLE 023

Permanent target: THE 1953 TRUST (Epstein pour-over, executed 8 Aug 2019, USVI). **Classification:** open-source compilation. **Not legal advice. Not an accusation of uncharged crime.**

Cycle clock: 23 Sep 2026 ~17:00 PDT / 20:00 ET. **Agents:** Ontologist, Distiller, Synthesizer, Bloodhound + sub-bloodhounds (independent methods; no mirrored search paths).

Prior cycle: C022. This cycle is a same-day late-field delta plus named-official and adjacent-track expansion. **Negative controls remain the controlling facts.**

1. Controlling calendar (unchanged unless noted)

- Ward v. Indyke, 1:24-cv-01204-AS (S.D.N.Y., Subramanian): last public ECF still 445 (17 Sep 2026 further-notice order) and 446 (Lelchuk / notice mechanics). No ECF 447+ located on open indexes this cycle. Final-approval hearing remains 2 Dec 2026, 14:00 ET after supplemental social-media notice modeled on Doe v. BofA, 25-cv-8520 ECF 134.
- 1:26-cv-08047 (Woods III): complaint 15 Sep 2026 (Freeman / Nappi; Jane Doe + “Amy”); last verified open docket point remains magistrate track / ECF 12 from prior cycles. No new open ECF increment confirmed this cycle.
- USVI probate accountings: 27th accounting through 30 Jun 2026 still the last quantified public cut (\$107.645M gross / ≥\$27M quantified liabilities). 24th accounting snapshot \$127.40M at 30 Sep 2025 remains the mid-cycle comparator. No 28th accounting located.
- SDNY inquiry (Indyke / Kahn): still uncharged. Ruzumna: clients not subpoenaed, not told they are subjects or targets; aware prosecutors asked to speak with at least one person who “provided services” to Epstein. DOJ official line remains non-comment on existence of investigations plus the standing Epstein evidence clause.
- Deckoff / VIBIR: answer / responsive pleading window previously set 19 Oct 2026 after AAG extension request. Island purchase \$60M (2023); refund claim \$5,757,038.
- 1:25-mc-00031 (N.D.N.Y. Truist satellite): closed 7 Jan 2026.

2. C023 new / newly sharpened nodes

Press-field late delta (same calendar day as C009–C022 inquiry wave)

- New York Post (Ariel Zilber, 23 Sep 2026, 12:02 ET): SDNY probe framing plus Senate Finance Aug 2026 characterization that Indyke and Kahn held signatory authority or powers of attorney over JPM and Deutsche Bank accounts. Adds a mass-market reprint of the signatory node already in the Senate compilation.
- The Independent long-form (23 Sep): death-time estate “as much as \$650 million”; compensation fund “more than \$120 million”; remaining assets “roughly \$127 million” per an October 2025 court filing. That \$127M figure is consistent with the 24th-accounting comparator, not the later 27th \$107.645M cut — treat as vintage-stamped, not a new accounting.
- Forbes (Alison Durkee), CNBC, Washington Examiner, Mediaite, Raw Story, yourNEWS, Annahar: syndication layer. No independent charging document. Grade = press-on-press except NBC official-source and Examiner source-familiar confirmation already logged C017–C019.
- Prameya News (22–23 Sep): Shuliak-as-primary-heir reprint of the Feb 2026 NYT / EFTA trust dump. No new instrument pages.

Named officials and adjacent instruments

- Jalicha Persad, Assistant Attorney General (USVI): authored the VIBIR extension request in Deckoff’s District Court of the Virgin Islands tax-residency / refund action (reported 8 Aug 2026, St. Thomas Source). Node is territorial-defense counsel, not a 1953 Trust fiduciary.
- Stephen H. Deckoff — KVH Industries board (independent director from Jun 2023; prior observer Feb–Jun 2023). Public 13F sleeve for Black Diamond Capital Management reported ~\$151.0M portfolio value (Insider Monkey cut dated 14 Aug 2026) with CPSS / KVHI / VZ / CPHC / WYNN as large holdings. This is the public-equity window only; private AUM claimed at ~\$10B on the Forbes profile (\$2.861B / world rank #1474 as of 23 Sep 2026).
- SD Investments: 2023 purchase-release language that a significant portion of the \$60M island proceeds would flow to the USVI government under the prior estate settlement. Adjacency to territorial remainder (\$74–79M Rhymmer band), not to trust corpus.

- Katie Phang v. DOJ / Todd Blanche track (D.D.C., Judge Emmet Sullivan): June 2026 preliminary-injunction order on EFTA production defects (unredaction of specified email threads and draft-indictment co-defendant fields). Parallel transparency track to Preska's 11 Aug 2026 protective-order modification in Giuffre v. Maxwell; different court, different corpus.
- Poncys motion to intervene in Giuffre v. Maxwell denied without prejudice (Preska 11 Aug 2026 order closing Dkts. 1353 and 1358).
- In re Grand Jury Subpoena, 19MC149 (CM) (S.D.N.Y.): the 9 Apr 2019 order cited as the conduit by which Boies Schiller materials reached the government and now sit inside the EFTA production path. Node is a 2019 miscellaneous grand-jury wrapper, not a 2026 charging vehicle.
- Daniel Weiner: 16 Sep Reuters non-comment for Indyke on the 08047 CSAM class — dual-counsel split vs Ruzumna (inquiry / Ward) remains live.
- Reuters 16 Sep quantification on 08047: at least \$6 million floor for 40+ putative class members; \$150,000 statutory / liquidated figure per CARDII / §2255 pleading theory. Demand, not judgment.

3. Ontology (distilled)

The 1953 Trust is a pour-over receptacle sitting after (a) debts, taxes, and administration, (b) surviving civil claims, (c) the Ward settlement if finally approved and funded, and (d) any additional estate-side judgments (08047 and others). Priority bequests in the EFTA-released instrument — Shuliak \$50M cash + \$50M annuity, Indyke \$50M, Kahn \$25M, then a long ranked list including Maxwell and Mark Epstein at \$10M each in public summaries — are nominal. They do not create present payable interests while probate and class tracks remain open. Executors also hold a \$250,000-each will-side fee clause that prior cycles recorded as undrawn pending completion.

Criminal-inquiry reporting and beneficiary status are ontologically separate. An uncharged SDNY document/interview campaign can coexist with (i) civil settlement without admission, (ii) trust remainder hopes, and (iii) estate-paid defense costs. No public instrument this cycle converts the inquiry into an indictment, a freeze order, or a trustee-removal petition.

4. Bloodhound negatives (this cycle)

- No PACER-visible ECF 447+ on Ward.
- No 28th USVI accounting PDF or docket minute.
- No indictment, information, target letter, or named-prosecutor charging memo.
- No public identification of the 08047 magistrate beyond the prior VF / ECF 12 breadcrumb.
- No new Valar 2026 maturity close; no named liquidating-fund identity.
- Giuffre-estate / Blatchford track is a Maxwell-case substitution and WA probate fight, not a 1953 Trust distribution channel.

5. Gap register increment G-01–G-104

Prior gaps G-01–G-98 stand. New this cycle:

- G-99 — Whether the Independent / Oct-2025 \$127M remainder cite is the 24th accounting or a different filing; reconcile line-by-line to the 27th \$107.645M cut.
- G-100 — Persad extension order text and the precise VIBIR case number (G-66 / G-72 carry).
- G-101 — Whether Black Diamond's private vehicles (non-13F) hold any residual Epstein-adjacent paper after the island close.
- G-102 — Sullivan/Phang production log vs Preska/EFTA production log: overlap set of documents.
- G-103 — Identity of the "provided services" witness referenced by Ruzumna (NBC).
- G-104 — Whether Weiner's 08047 non-comment implies a separate engagement letter from Patterson Belknap / Ruzumna.

6. Agent-method notes (non-mirrored)

- Ontologist: mapped inquiry / remainder / territorial-settlement / island-title as four non-identical pots.
- Distiller: separated vintage (\$127M Oct-2025) from latest probate cut (\$107.645M Jun-2026).
- Synthesizer: treated Phang-Sullivan and Preska-Giuffre as parallel EFTA pipes, not one case.

- Bloodhound: name-search Persad, KVHI board, 19MC149, Poncys; docket-search Ward 447+ (null); accounting-search “28th” (null).

7. Backup / deploy

Local: artifacts/intel/1953-trust/STRAND-1953-TRUST-INTEL-MEMO-C023-2026-09-23.pdf and strand-swarm-v3/out/C023_BREADCRUMB.json. Drive folder STRAND_1953_TRUST_INTEL (id 1wiXh3en7s8H7BKixEWWr6pDIlxStx0xF) receives the intel path by mount-sync. GitHub cantgetalonggta-png/strand-osint-mesh receives the cycle breadcrumb and status note.

Disclaimer: public-source educational compilation. Uncharged allegations remain uncharged. Survivor claims are pending or settled on their own dockets. Do not treat bequest schedules as payable cash.

END C023 — 23 Sep 2026
