

STRAND C028 — THE 1953 TRUST Educational Intel Memo

Classification: open-source / educational OSINT. Not legal advice. Cycle 028 completed 23 Sep 2026. Target: THE 1953 TRUST (USVI pour-over, signed 8 Aug 2019).

1. Mission and method

Permanent mission remains the 1953 Trust as a vehicle, not a conspiracy narrative. C028 is a same-day press-field + docket negative-control pass after C024–C027. Agents (Bloodhound / Distiller / Synthesizer / Ontologist) ran independent queries: NYT 23 Sep 20:34 ET confirmation of an uncharged SDNY inquiry; PACER/CourtListener last Ward entries still ECF 445/446; no 28th USVI quarterly accounting located; Wikipedia and smw.ai calendar drift.

2. Status locks (unchanged unless noted)

Ward v. Indyke, 1:24-cv-01204-AS: last public entries ECF 445/446; final fairness hearing reset to 2 Dec 2026 14:00 ET after supplemental social-media notice. No ECF 447+ located on public RECAP/CourtListener indexes this cycle. 1:26-cv-08047 (Woods III / Jane Doe & Amy) remains at early magistrate track (prior ECF 12). 1:25-mc-00031 NDNY Truist satellite remains closed 7 Jan 2026. No 28th USVI estate accounting published. SDNY inquiry: still uncharged; counsel Ruzumna continues the no-subpoena / not-told-subject-or-target line.

3. New or upgraded nodes (C028)

N-C028-01 Matthew Goldstein / NYT 23 Sep 2026 20:34 ET. Independent confirmation that Manhattan federal authorities (FBI + SDNY) have begun investigating activities of Darren Indyke and Richard Kahn. Scope not public. Credits WSJ as earlier report. Adds: federal authorities did not interview Indyke or Kahn after Epstein's 2019 arrest/death; EFTA/financial-record release "fanned calls" for a fresh look; remainder-fee language restated (\$50M Indyke / \$25M Kahn if residue exists after claims).

N-C028-02 Remainder economics vs corpus. Independent, Forbes, CNBC, NYPost, NBC, Washington Examiner, Mediaite, Annahar all reprint the same-day field. Independent still cites ~\$127M October 2025 vintage against the 27th accounting \$107.645M gross / ≥\$27M quantified liabilities to 30 Jun 2026. Residue is not the same object as intended 1953 Trust bequests (\$100M Shuliak structure; \$50M/\$25M executors; \$10M Maxwell; \$10M Mark Epstein; \$5M Nowak; redacted Article III sub-trusts).

N-C028-03 Calendar drift nodes. smw.ai still lists the Ward final hearing as 16 Sep 2026 (pre-reset). Wikipedia estate page restates 40-name / pour-over characterization and January 2026 Oversight subpoena language; does not yet lock 2 Dec 2026. Treat as tertiary, not docket.

N-C028-04 Beneficiary-count collision. Public secondary counts disagree: NYT "40 names"; Epstein Exposed "41 beneficiaries / \$350M+"; Business Insider "43 bequests totaling >\$330M" vs January 2019 trust "32 bequests ~\$225M." C028 does not adjudicate; flags G-116.

N-C028-05 Dual-counsel persistence. Ruzumna (inquiry / Patterson Belknap) vs Weiner (Ward / estate cooperation statements) remains a live affiliation split, not a merger.

4. Ontology (vehicle map, condensed)

1953 Trust = USVI pour-over signed 8 Aug 2019; co-trustees Indyke/Kahn; \$250k/yr undrawn fee clause previously mapped. Adjacent vehicles already on the graph: 2019 Trust (18 Jan) + 4 Feb amendment; 2013/2006 Butterfly; 2017 Caterpillar (Wallace/Groff); Article III Shuliak/redacted sub-trusts; NES LLC; Maple Inc.; Lyn & Jojo LLC; Nine East 71st; LSJVI / SD Investments / Deckoff–Black Diamond island path; Hyperion Air / HBRK / AIR GHISLAINIK. C028 adds no new corporate formation; it adds a press-grade confirmation layer on the inquiry node.

5. Gaps G-01–G-116 (new this cycle)

Prior gaps G-01–G-110 remain open unless a later docket closes them. New: **G-111** NYT vs WSJ first-print delta (what, if anything, NYT independently verified beyond two unnamed people). **G-112** NYT claim that feds never interviewed Indyke/Kahn after 2019 — documentary cite still missing. **G-113** whether \$50M/\$25M remainder is still operative after Ward \$35M/\$25M ratchet + USVI remainder + taxes. **G-114** smw.ai stale 16 Sep listing. **G-115** Wikipedia 40-name vs 41/43 bequest counts. **G-116** primary EFTA PDF page map for each named bequest (EFTA00099303) still not page-cited in this cycle.

6. What C028 did not find

No indictment, information, target letter, or Rule 6(e) public residue. No 28th accounting. No Ward ECF 447+. No VIBIR docket number for the Deckoff \$5.757M suit (answer still calendared 19 Oct 2026). No named 08047 magistrate beyond prior "VF" stub. No activation proof that HBRK / Caterpillar Schedule A intersects current 1953 corpus.

7. Next-cycle tasking (C029)

Bloodhound: CourtListener incremental crawl ECF ≥ 447 and 08047 ECF ≥ 13 . Distiller: 27th vs Independent \$127M vintage table. Synthesizer: bequest-count reconciliation against EFTA00099303 if a public PDF mirror is reachable. Ontologist: keep inquiry node at "press-grade, uncharged." Upgrader: refresh smw.ai as a known-stale calendar source, not a fact source.
